

**What is Claimed:**

- 1 1. A method of reminding for a certain call which should be established,  
2 comprising the step of activating a reminder functionality for indicating in  
3 advance at a mobile phone, from which said call should be established, that  
4 said call should be established.
  
- 1 2. A method of claim 1, wherein the step of activating is based on a  
2 programmable time and/or is automatically activated in regularly time  
3 intervals.
  
- 1 3. A method of claim 1, wherein the step of indicating comprises the  
2 indication of the time at which said call should be established, and are of the  
3 subscriber number and the subscriber name to which said call should be  
4 established.
  
- 1 4. A method of claim 1, wherein the step of indication is performed in at  
2 least one of an optic and/or acoustic way and/or by means of vibrations.
  
- 1 5. A method of claim 1, further characterized in that the call reminder is  
2 activated by a remote device designed to communicate with said phone at  
3 least a moment prior to or at the time at which said call should be established,  
4 especially by means of E-mail and/or SMS.
  
- 1 6. A method of claim 1, further characterized in that at least the last time  
2 according to which it was tried to carry out a certain call is indicated.
  
- 1 7. A method of 1, further characterized by requesting the user in  
2 response to an unsuccessful call attempt, in particular be means of an  
3 interactive menu procedure, if said call should be established after a certain  
4 time again.
  
- 1 8. A method of claim 1, wherein the phone (1) is switched on in response  
2 to an activation of said call reminding functionality.

- 1 9. A method of claim 1, wherein the step of establishing said certain call  
2 is automatically activated in response to at least one of the step of indicating  
3 confirmation by the user.
- 1 10. A system, comprising:  
2 means for establishing a call, and  
3 means for reminding a user to establish the call.
- 1 11. A system of claim 10, wherein the means for reminding is  
2 programmable, and adapted to automatically activate the means for indication  
3 in regular time intervals.
- 1 12. A system of claim 10, characterized by a storage associated to the  
2 means for reminding, wherein the storage is designed for storing at least one  
3 of a reminding time and at least one subscriber number to which a call has to  
4 be generated at a determinable time.
- 1 13. A system of any of claim 10, characterized in that said system is  
2 incorporated within a mobile phone adapted to operate on at least one of a  
3 GSM-standard and/or a UMTS-standard.
- 1 14. A system of any of claim 10, wherein the means for establishing a call  
2 is incorporated within a mobile phone, and the means for reminding at least is  
3 partially incorporated within a further electronic device, adapted to  
4 communicate with the mobile phone, especially, via E-Mail and/or SMS.
- 1 15. A system of claim 10, wherein the means for indication adapted to  
2 indicate at least one of the time at which said call should be established, the  
3 subscriber number and the subscriber name to which said call should be  
4 established.
- 1 16. A system of claim 10, wherein the means for indication reminding  
2 comprises a display, an acoustic indication means designed for signalling a  
3 specific tone or melody or voice output and an indication means adapted to

4 generate a vibration of the phone means.

1 17. A system of claim 10, wherein the reminding means is adapted to  
2 request the user in response to a failed call attempt, if the said call should be  
3 established after a certain time again.

1 18. A system of claim 10, wherein the means for reminding is switching on  
2 the means for establishing in case the means for establishing is switched off  
3 during a reminding condition.

1 19. A system of claim 10, adapted to indicate at least the last time  
2 according to which a certain call was tried to be established.

1 20. A system of claims 10, wherein the means for reminding is designed to  
2 remind in regularly time intervals in response to a call which could not be  
3 established.

1 21. A system of any of claims 10, wherein the phone means for  
2 establishing a call is automatically activated by the reminding means.
